UCLA State-of-the-Art Urology

This course explores the most challenging management problems facing the practicing urologist. Distinguished faculty present current information and techniques in urologic oncology (prostate, bladder, kidney), male and female voiding dysfunction, incontinence, urinary tract infection and inflammation, BPH surgical therapies, stone disease, male infertility, hypogonadism, prostate cancer focal and radiation therapy, perineal prostate biopsy, active surveillance, genetic testing, advanced prostate cancer therapy, non-muscle invasive bladder cancer, the small renal mass, practice management, and GU dermatology. The conference emphasizes interaction between participants and faculty and allows ample time for case presentations and group discussions, ensuring an outstanding educational experience for attendees.

At the completion of this program, participants should be better able to:

- Analyze for aquablation and prostate artery embolization for BPH
- Assess and manage nocturia
- Implement stress urinary incontinence procedures in women
- Treat neurogenic lower urinary tract dysfunction
- Address radiation-induced injury of the lower urinary tract
- Perform perineal biopsy in clinical practice
- Apply active surveillance for prostate and kidney cancer
- Execute radical prostatectomy continence and potency sparing techniques
- Administer focal therapy for prostate cancer
- Determine appropriate use of testosterone in men with prostate cancer
- Treat non-muscle invasive and BCG recurrent bladder cancer
- Manage advanced prostate cancer
- Manage the small renal mass and bilateral renal masses
- Assess and treat male and female voiding dysfunction and utilize urodynamics
- Manage male incontinence conditions
- Diagnose and treat UTI and other inflammatory conditions
- Evaluate the role for ureteroscopy suction devices
- Apply medical management for stone disease
- Diagnose and treat male infertility
- Adapt practice management strategies in an ever-changing environment
- Diagnose and treat GU dermatologic conditions

A few days before the meeting you will be emailed instructions on how to download the individual speaker handouts.

Disclosure

The FDA has issued a concept paper that classifies the commercial support of scientific and educational programs as promotional unless it can be affirmed that the program is “truly independent” and free of commercial influence. Along with independence, the FDA requires that non-promotional, commercially supported education be objective, balanced, and scientifically rigorous. The policy further states that all potential conflicts of interest of the CME staff and faculty be fully disclosed to the program’s participants. In addition, Accreditation Council for Continuing Medical Education policy mandates that the sponsor adequately manage all identified potential conflicts of interest prior to the program. We at UCLA fully endorse the letter and spirit of these concepts.

The Department of Urology is a California Board of Nursing approved provider (#8888).
