## Geriatric Medicine Grand Rounds

### Overview

The Division of Geriatrics grand rounds aims to update clinicians, researchers, and students on clinical guidelines, practice management, and recent research related to older adults. Given the geriatric population's exclusion from trials and the lack of consensus guidelines, physicians face challenges in caring for them. With an aging population and a shortage of geriatricians, these rounds address chronic condition management, care transitions, and geriatric syndromes with expert discussions. Attendees can apply this knowledge for better patient care, emphasizing quality improvement in transitions, re-admissions, medication adverse events, and patient satisfaction. The sessions will be live-streamed and archived on the Department of Medicine Website for ongoing reference.
