Learning Objectives

- 1 Appreciate the significant evidence base for restorative practices and their indigenous, ancestral, and historical origins.
- 2 Reflect on how restorative approaches can serve as upstream interventions to address institutional contributors to the social determinants of health, including racism, exclusion, moral injury, and provider burnout.
- 3 Identify how relational harm and institutional culture can influence clinical care, trust-building, and patient outcomes, particularly among populations impacted by health inequities.
- 4 Understand the restorative mindset and the basic tenets of restorative practices, including how to identify and activate the appropriate tier of restorative practice within an academic clinical environment.
